**For each of the MKO First Nation communities which receive electricity service from Manitoba Hydro, please indicate, as applicable:**

**g) the annual revenue from each of a) through e), above, from the current rates and the proposed rates.**

**ANSWER:**

The following tables present the 2013/14 actual non-weather normalized revenue for Residential customers (Total and First Nation) and General Service customers (Total) by First Nation community. The revenues generated in 2013/14 included April 2013  
2014 04 15

consumption at rates approved September 1, 2012, and May through March consumption at rates approved effective May 1, 2013. In addition, it should be noted that this consumption reflects the impact of colder than normal weather and that these communities are primarily electrically heated.

A revenue estimate under the proposed rates for these accounts is not available within the timeframe for this Application. It is not appropriate to simply adjust 2013/14 actuals by the proposed rate increase, as these revenues do not reflect annualized revenues from current rates. Furthermore, the consumption is not weather normalized, and such an analysis may over estimate the impact of the rate increase due to the colder than normal weather experienced in the 2013/14 fiscal year.

As noted in Manitoba Hydro's response to MKO/MH I-1(f), Manitoba Hydro is unable to provide the breakdown for the First Nation General Service and First Nation Education accounts as, given the number of such customers within each community, providing this information may result in the disclosure of individual customer information.

For the purpose of this response, First Nation accounts are defined by having a Band Treaty Number listed on the customer account.

**PREAMBLE TO IR (IF ANY):**

at page 44,

“MKO also favoured the creation of a new class for Hydro-affected customers residing on the waterways utilized by MH, a class to receive a specific sharing of net export revenue based on recognition of a fundamental change having occurred with respect to the understanding in place when First Nations entered into treaties and signed mitigation agreements with the Province. The change is, as previously indicated, the reliance on export sales; initially, the basis for northern generation plants was electricity for Manitobans.”

at page 47,

“The Board will also direct: ( ... ) (e) MH is to file a report considering MKO’s suggestions, both with respect to cost and rate relief for First Nations customers now incurring rates partially based on mitigation costs, and to MH providing First Nations customers with a greater share of net export revenue based on MKO’s interpretations of previous understandings and agreements”.
