

MIPUG MFR 14

A breakdown of the 3 GS Large classes in the event Hydro imposed the voltage distinctions used by BC Hydro, that is, 60000 volts or higher are in a single class (and other GS Large are in a separate class). Provide the billing determinants for the 2 new classes.

Manitoba Hydro has not undertaken a study to re-classify customers by other criteria as requested in this MFR and as such the information is not readily available.

Please also refer to MIPUG MFR 12.
