Residential Permit Fees

IMPORTANT: New single dwellings over 200 amps require a separate commercial permit for the electric service. The permit fees for generators, electric vehicle supply equipment, renewable energy supply equipment and energy storage systems are listed below, however this equipment requires a commercial permit.

Description	Fee
1. Minimum non-refundable permit fee.	\$165
2. Single dwellings:	
New single dwellings 200 amps or less with service included. <i>Important notes: A commercial permit is required for any generators, renewable energy systems or self-contained energy storage systems.</i>	\$400
New single dwellings over 200 amps. <i>Important Notes: A commercial permit is required for the service, generators, renewable energy systems or self-contained energy storage systems.</i>	\$400
3. Ready-To-Move (RTM) and Mobile Homes. <i>Important Notes: Separate permits are required for: wiring RTM at the building site, wiring RTM at the permanent site, and connection of a mobile home.</i> • Separate lower level (basement) rough-in and final inspections for RTM at permanent site requires separate permit (see Residential Item 10)	\$220
4. Additions and alterations to service, meter socket, distribution panels, temporary services or reconnection of existing services.	\$165
5. Electrical equipment such as devices, fixtures, motors, central heating, cooling, air conditioning units, heat pumps, pools, hot tubs, spas, and miscellaneous residential equipment.	\$165
6. Generators Residential (must be submitted on a commercial application).	\$165
7. Electric Vehicle Supply Equipment Residential (must be submitted on a commercial application).	
Level 2 Residential - 208/240 volt electric vehicle supply equipment 40 Amps or less	\$220 per charger
Level 2 Residential - 208/240 volt electric vehicle supply equipment above 40 Amps	\$220 per charger
8. Renewable energy including solar photovoltaic panels, wind turbines and hydropower systems (must be submitted on a commercial application).	
Renewable energy system 2kW or less	\$100 per 500 W increment
Renewable energy system over 2 kW – first 2 kW	\$400
Renewable energy system over 2 kW – each additional kW	\$40 per kW
9. Energy Storage Systems (must be submitted on a commercial application).	
Self-contained residential energy storage system 10 kW or less	\$220
Self-contained residential energy storage system greater than 10 kW	\$440
10. Residential garage, addition, sunroom, recreation room or similar outbuildings less than 90 square metres.	\$220
11. Trench or overhead conductors.	\$165
12. Safety inspection of a residential building located within a National Park.	\$220
13. Permit renewal fee for an additional year of time.	\$110
14. Special inspection prior to reconnection of existing residential services that have been disconnected for 6 months or longer.	\$220
15. Residential contractor reinspection or extra inspection fee. <i>Note: A reinspection fee may apply for the reinspection of corrected code violations.</i>	\$165

Administrative Fees

Description	Fee
1. Hourly inspection rates including safety inspections. <i>Important Note: For the inspection of an installation where the previous fees are not applicable.</i>	
Inspection during normal office hours	\$110 per hour or part thereof
Inspection outside of normal office hours	\$220 per hour or part thereof
2. Travelling expenses - When a special trip is required a minimum 3 hours will be charged at the hourly inspection rate, when the installation is not accessible by road additional travel expenses may be charged in addition to the regular inspection fees.	
3. Penalties.	
Proceeding with electrical work without a previously issued permit.	\$500 + applicable permit fee
Reinstatement of permit privileges	\$250
