

## Manitoba Electrical Code Inspection Notice

---

### **28-900 Disconnecting means required for generators**

#### ***Effective Date:***

Immediately

#### ***Scope:***

To clarify when an additional disconnecting means for a standby generator will be permitted.

#### ***Requirements:***

Rule 28-900(4)

For the application of subrule 1, a load box disconnect that is interlocked with the main disconnecting means or has a shunt trip scheme will only be considered as having one main disconnecting means.

#### ***Rationale:***

We will allow you to have an additional disconnect for a load box

#### ***Supporting Information:***

Manitoba Electrical Code: Section 28

#### ***Issued By***
