

We want to hear from you.

What do you think of the Manitoba-Minnesota Transmission Project Preferred Border Crossing and Alternative Routes?

Manitoba Hydro is proposing to construct a 500-kilovolt transmission line from Winnipeg to Minnesota to sell surplus power and enhance the reliability of supply in Manitoba in times of drought or emergency.

You are invited to drop by during any open house to review the project and share your comments, feedback and local knowledge. **Manitoba Hydro will present refined alternative routes and a preferred border crossing for review.** Your feedback will help us determine a preferred route for the project.

Open houses will be held from 4 to 8 p.m. at the locations listed here. We will be available to provide project information and answer questions. Refreshments will be served.

Find more project information or to sign up for project email updates at www.hydro.mb.ca/mmtp

You can also phone 1-877-343-1631 or email mmtp@hydro.mb.ca
