

# St. Vital Transmission Complex Public Open Houses

To improve system reliability and accommodate growth and demand for electricity in southern Manitoba, Manitoba Hydro is proposing construction of two 230-kilovolt transmission lines originating at the St. Vital Station in southeastern Winnipeg. One line will run south to the Letellier Station and the other will run to the La Verendrye Station.

**Alternative routes will be presented within this planning corridor at the open houses.**

You are invited to attend one of the Open Houses below to share your comments about this project. Staff will be available to provide project information and answer questions. Your feedback will help us determine a preferred project route. Refreshments will be served.

## Dominion City

August 20

4 to 8 p.m.

Dominion City Community  
Hall

## Mitchell

August 21

4 to 8 p.m.

Mitchell & Area Seniors  
Centre

## Winnipeg

August 22

4 to 8 p.m.
