

Corporate Overview MFR 1

Acknowledgment from Utility that all prior evidence from all prior Public Hearings is available to be used in the review of the current application before the Board.

For purposes of this submission, Manitoba Hydro provides confirmation that the PUB can rely on the evidence submitted during the course of the GRA. The Supplemental Filing provides information that supplements Manitoba Hydro's request for a 2016/17 electricity rate increase made during the 2015/16 & 2016/17 General Rate Application. Manitoba Hydro is providing updated actual information in several of the responses to the MFRs, which constitutes the most up to date information to review the requested rate increase.
